

# CNIIC

A model to explore systems mapping

# CNIIC Model

# The CNIIC model

- **Context** – the influence of the environment the team operates in
- **Narrative** – the story the team tells itself and tells others about itself
- **Identity** – the assumptions the team makes about who we are and how it works, can include its values and how it presents itself to the outside world
- **Individual performance** – how each person chooses to work within the team
- **Collective performance** – how the team combines the strengths and energies of the team members to produce an optimum result
